PHOTOS FOR ALL SEASONS

Every moment of the year is perfect to appreciate what the Torgnon area offers enthusiasts of photography. Not only landscapes but a challenge to try various techniques will be perceived by keen eyes and lenses.

PHOTO HUNT

Several species of **ungulates** (deer, rock goat, chamois, roe), **birds** (from predatory species to the typical woodland bird life) and **small mammals** (marmot, hare, ermine).

LANDSCAPE

Suggestive views of the **Cervino**, the **Tzan peak** and other more isolated natural elements that, however, do not lack charm for this reason, like **lake Tzan** and the **natural reserve of Loditor**.

AUTUMN PICTURES

The phenomenon of **foliage**, whose spectacular shows include larch woods that turn from sparkling green into bright yellow and deep orange, enhancing the woodland slopes with warmth and unique enchantment.

THE MACRO LENS

Many **dragonflies** and other insects that populate the fields and woods of Torgnon, like the **flowers and sprouts** that, in spring, remind us that mountain trees and shrubs are reawakening.

RURAL SETTING

Summer is especially the ideal time to approach the world of **mountain pastures** to watch mountain-dwellers at work and the quiet life of the red and black-chestnut speckled bovines of Valle d'Aosta that pasture on the slopes of the alpine prairies at an altitude over 2,000 m. In some alpine pastures you may also watch the processing of **Fontina DOP** cheese (protected denomination of origin), which is prepared with the unique rules and expertise the mountain cheese producers are proud to possess.

SOME TIPS TO OBSERVE ANIMALS IN NATURE

DO NOT GO TOO CLOSE

SEEK A GOOD OBSERVATION POINT

FIRST STUDY THE HABITS OF THE ANIMALS

DRESS WITH WARM CLOTHES THAT ARE NOT VERY COLOURFUL

SILENCE IS PRECIOUS

DO NOT TOUCH OR FEED THE ANIMALS

DO NOT PICK UP ANYTHING

DO NOT USE DECOYING DEVICES

DO NOT BLOCK THE PATH OF ANIMALS

BE THANKFUL FOR WHAT YOU SEE
